

## *MAR-KIT*

### Marble Dust Repair Kit

#### Description

MAR-KIT is a blend of marble dust and medusa cement, combined with a unit of acrylic latex.

#### Theoretical Coverage

- 1 unit covers approximately 8 sq.ft. (1/8" thick)

#### Typical Uses

- Patching concrete pools

#### Safety Precautions

Please refer to product Safety Data Sheet

#### Features

- For vertical or horizontal use
- Paintable in 4 days

#### Limitations

- Surface and air temperatures MUST be at least 10°C (50°F) during application and initial cure
- DO NOT allow kit components to freeze

#### Application

- Use some of the Admix supplied to lightly dampen repair area
- Pour remaining Admix into separate container and add an equal amount of water
- Reserving some liquid for thinning the compound, add Admix to powder and mix well with slow speed mixer
- Add remainder of Admix, with more water to desired consistency
- Let stand 10min., remix and use
- Clean tools with warm, soapy water before product dries
